

FIU iREAL Commission
Final White Paper Report
March 31, 2014

Introduction

American research universities, both public and private, are facing profound challenges. Disturbances "from unstable revenue streams, demographic shifts in the US population, changes in the organization and scale of research, and shifting relationships between research universities, government and industry" are affecting the way universities currently operate ("Research Universities and the Future of America," National Academies Press, 2012). Public research universities face more significant challenge as state funding, already eroding over the last two decades, was further reduced by the recent economic recession. As digital technology democratizes knowledge and the access to learning, institutions of higher education are finding themselves in a globally competitive market. Demand from industry for well-rounded employees and demand from students for an education that prepares them for a rapidly shifting job market further challenge the status quo. These challenges provide an opportunity for re-envisioning FIU's future.

To address these major trends at Florida International University, President Mark B. Rosenberg charged the ten iREAL (integrating Research, Engagement, Assessment and Learning) Commissioners, led by Dean Kenneth G. Furton of the College of Arts & Sciences, with drafting a white paper to identify ways FIU can leverage its current success as a world class research university, that is also a community engaged solutions center, to be more world serving and stay competitive. The Commissioners are using this opportunity to create a vision that will position FIU as a leader in redefining the role of the American public research university in the 21st century and as a leader in innovative higher education in South Florida. Working from the ten questions posed by President Rosenberg in May 2013 (Towards a New Strategic Plan, Appendix 1), the intent of this white paper is to inform FIU's next strategic plan.

The future of FIU is seen in the following context:

- Miami and South Florida are at the front line of global change; as the gateway to the Americas, they are at the vanguard of many social, demographic, scientific, and environmental challenges that have national and global relevance and that will directly impact FIU's future. Yet Miami still ranks 43 out of 51 among metro areas for baccalaureate attainment. The growth of Miami and FIU are directly linked.
- Declining state appropriations are forcing universities to find external funding or risk closing programs.
- The State University System of Florida's shift towards performance based funding creates greater competition for state revenues. Additionally, the prospect of federal financial aid being tied to performance is increasingly real.
- A greater presence of lower cost degree options including online only universities, community colleges, for profit colleges, Massive Open Online Course (MOOCs), etc.
- Competency-based assessment (CBA) practices challenge academic programs to focus on competencies of graduates rather than required curricular sequences.
- Employers expect university graduates to be critical thinkers who can communicate effectively, work in teams, and be resilient and responsive learners able to integrate knowledge across disciplines to more readily adapt to a rapidly changing global environment.
- The financial need of students is growing. 50% or more of FIU's students receive federal financial aid and 50% of these are at the level of greatest need.
- Public universities have a responsibility to provide a high quality education and to foster civic, intercultural, and ethical learning that will guide a student's life and work.

- Institutional challenges include increasing competition for quality faculty and students, restrictions on tuition revenue, rising infrastructure costs, and declining state and national funding for research.

The Commissioners agree that in order to meet the expectations of the State University System of Florida and the needs of our students, faculty, and our community, FIU must find creative responses to the profound transformations facing higher education. To this end, the Commissioners recommend the following nine **bold actions for FIU**:

Recommendation 1: Dramatically increase the percentage of students graduating in 4-6 years

Metric: Strive for a 70% graduation rate by 2020

Recommendation 2: Prepare graduates for seamless career integration and entrepreneurial success in the global marketplace

Metric: Require experiential learning and maintenance of electronic portfolio of student work that demonstrates accomplishment in key skill and knowledge areas (effective communication, knowledge in their field, etc.) by 2017

Recommendation 3: Grow: aggressively and strategically

Metric: Increase enrollment to 65,000 students by 2020 and increase quality of first time in college (FTIC) students each year (e.g. higher average GPA)

Recommendation 4: Expand financial base through organizational efficiencies, diversification of revenue streams, and incentive-based budgeting

Metric: Invest resources in preeminent programs utilizing an incentive-based budgeting system implemented in 2016

Recommendation 5: Launch a synchronized communications campaign to elevate the FIU brand focused on attracting donors

Metrics: Increase the number of national and international media hits annually and complete capital campaign raising more than \$750M in private gifts by 2020

Recommendation 6: Intentionally pursue Carnegie “Very High Research” Designation

Metric: Increase PhD production in STEM areas by 20% by 2020, increase patent production by 500% by 2020

Recommendation 7: Innovate and integrate healthcare education, research, and delivery

Metric: Grow health-related grant funding by 100% by 2020 through FIU’s Innovative Health Initiative as a global leader in strategic areas

Recommendation 8: Strengthen reputation as critical academic partner/solutions center for the local marketplace and beyond

Metric: Increase public/non-profit/private partnerships and pioneering research that address community needs

Recommendation 9: Leverage global status of FIU and Miami

Metric: Increase international student enrollment, develop additional global business partners, and expand international programs

Recommendation 1: Dramatically increase the percentage of students graduating in 4-6 years

Metric: Strive for a 70% graduation rate by 2020

The primary driver for change in the delivery of education at FIU is the need to improve student learning, retention, and graduation rates. Not enough students are completing their degrees in a timely manner. Difficulties passing gateway courses, challenges getting into high-demand courses, and a sense of isolation in FIU's largely commuter student population lead to decreased GPAs, lost scholarships, loss of motivation, an inability to justify the cost of education, and early departure.

Although FIU has recently improved the 6-year undergraduate FTIC (first time in college) graduation rate to 50%, which is leading among Hispanic Serving Institutions, it still lags behind peer top research universities. FIU must adopt a multi-prong approach in order to significantly increase the graduation rate. As leading retention scholars have recently indicated, doing so requires increased focus on the classroom experience and leveraging the expertise of faculty, who are critical agents in student retention. The approach should include improving access to and upgrading technology; creating more ways to assess prior learning; improving student services; and integrating, incentivizing, and rewarding faculty who conduct research, teach, and foster community engagement. FIU will distinguish itself as an educational institution through its in-class learning experience, which will use the best current practices in pedagogy and assessment to advance efficiency and rate of learning, while providing students with significant learning experiences.

Effective teaching is a core university responsibility. Given the many recent developments in neuroscience, biology, and cognitive science, FIU should provide additional opportunities for faculty to assimilate this research and determine which learning-centered teaching practices best suit their and their students' needs. For instance, research suggests that students learn better from a hybrid or blended approach of both high tech and high touch. To enrich the teaching experience and expose students to top-quality research, it is also important that researchers teach. A balance is necessary as overloading research faculty could divert them from their research and innovation activities and reduce teaching quality. FIU must integrate traditionally isolated activities (no longer teaching vs. research vs. community engagement) and promote it through incentives.

Degree programs that are focused around competency-based assessment (CBA) rather than credit hours and semester calendars allow working adults to study at their own pace to achieve the necessary outcomes. This minimally could be focused on General Education competencies, but ideally would expand to degree programs that can identify competencies of graduating students and development of effective assessment techniques to measure them. This model will depend heavily on faculty input and expertise, as they develop online learning activities designed to achieve competency and provide their expert feedback to students.

In addition to enhancing the online experience for students, it is important to remember and redefine campus life, as its energy and vibrancy are critical for students and alumni. A way to enhance campus life would be incorporating more places and experiences for students and alumni mentors to connect, communicate and collaborate. FIU must continue to offer robust athletics, creative, and cultural offerings. Athletics is a point of pride for many institutions for its students, community and alumni. Continuing to build a quality athletics program will generate excitement and pride in FIU, encouraging students to stay, the community to participate and alumni to return.

Finally, FIU must attract South Florida's best students and not cede them to other institutions in the state or beyond. By targeting recruitment resources towards the best local high school students, and enhancing dual enrollment courses county-wide, the university and student will see the benefits of increased graduation rates, reduced costs, and a greater return on investment.

Examples of implementation strategies for discussion:

- a. Focus on teaching excellence
 - i. Develop incentives for faculty to adopt blended learning techniques and implement strategies to improve student learning
 - ii. Identify outstanding instruction strategies and develop innovative mechanisms to share with all faculty and adjuncts
 - iii. Create opportunities for the best adjuncts to convert to permanent instructors
 - iv. Encourage more courses that involve both faculty and community expertise
 - v. Build on FIU's unique community outreach and enrich FIU's teaching by developing new experiential field-based learning programs
 - vi. Develop a comprehensive approach to evaluating teaching and establish incentives to promote continuous improvement of teaching

- b. Become more student-centered
 - i. Incorporate prior learning assessments such as CLEP, DANTEs, Portfolio assessments
 - ii. Identify competencies of General Education with concomitant competency-based assessment (CBA) strategies
 - iii. Determine degree programs that are compatible with CBA and encourage creative approaches to implement CBA
 - iv. Enhance dual enrollment to include working with all high schools
 - v. Expand seamless Undergraduate to Master's Degree Programs/3+2 programs
 - vi. Revamp first-year experience course (FIU Experience)
 - vii. Improve percentage of bachelor's degrees without excess hours
 - viii. Expand multi-disciplinary advising for well-rounded education
 - ix. Personalize services for national award winning students
 - x. Extend mentorship programs
 - xi. Focus on STEM advising
 - xii. Create environment to optimize the conditions for learning on campus
 - xiii. Strategize student recruitment
 - xiv. Target recruitment at local high schools and beyond
 - xv. Increase the quality of FTIC every year
 - xvi. Leverage athletics and cultural activities on campus to draw the community to campus

- c. Incorporate technology:
 - i. Make all university core curriculum courses and labs hybrid
 - ii. Build flipped classrooms
 - iii. Ensure classroom capture is available for all classes
 - iv. Adopt adaptive learning technology
 - v. Explore the gamification of education
 - vi. Expand the use of master course models
 - vii. Use data to assess student learning and online coaches for real time assistance
 - viii. Produce e-books and reduce reliance on traditional textbook

Recommendation 2: Prepare graduates for seamless career integration and entrepreneurial success in the global marketplace

Metric: Require experiential learning and maintenance of electronic portfolio of student work that demonstrates accomplishment in key skill and knowledge areas (effective communication, knowledge in their field, etc.) by 2017

FIU has a responsibility to prepare students to be professionally and personally successful in a century that is defined by rapid and unpredictable change. Employers are looking to FIU to develop students who are not only technically qualified but also critical thinkers, adaptable and multi-disciplinary. Since approximately 80% of FIU students remain in South Florida, FIU alumni are an essential part of the region's work force and a key resource for the state's future. Employers and alumni can be game changers by making investments of resources, time, and engagement to ensure industry integration for students.

FIU must go beyond traditional forms of engagement and gradually move corporations, the public sector, and alumni to a more holistic relationship with FIU – both for enhanced experiences for our students and researchers and for new investments. The engagement between employers and students must begin in year one and gradually progress to include concurrent internships and apprenticeship-style experiences.

Demographically, FIU is a mirror of its community – its residents and its students are truly global citizens. FIU also mirrors the entrepreneurial spirit of Miami so it is necessary not only to prepare students to enter companies but to also prepare them to start their own companies. The combination of a diverse student body, entrepreneurial thinking, and a global city gives FIU a unique advantage in developing what it means to be a 21st century workforce ready, college graduate.

Examples of implementation strategies for discussion:

- a. Enhance private/public partnerships (seamless integration with industry)
- b. Develop dedicated career services – varies by unit/discipline
- c. Utilize MOOCs to require a Tools for Life program for college seniors (preparation for life after university focused on financial competency and community engagement)
- d. Develop MOOCs to teach entrepreneurship to college juniors
- e. Work to minimize the impact of student loan debt
- f. Expand Student Employment Portfolio and ensure all FIU students graduate with one or more of the following: internship, study abroad, research study, creative project, community engagement activity, job experience or learning assistantships
- g. Require participation at select cultural events
- h. Demonstrate that FIU students can find jobs by increasing the number of baccalaureate degree graduates employed full-time one year after graduation
- i. Partner with industry to leverage diverse student population to develop employment pipelines for graduates

Recommendation 3: Grow: aggressively and strategically

Metric: Increase enrollment to 65,000 by 2020 and increase quality of first time in college (FTIC) students each year (e.g. higher average GPA)

Strategic growth is critical for the long-term success of FIU. Increasing the student base to 65,000 would allow FIU to meet the community demand for an affordable, high quality college education. Growth must ensure that FIU continues to attain and improve performance metrics to both maximize funding from the state and continue to provide an outstanding student experience. To achieve this balance, FIU must boldly expand on its successes blending high tech with high touch, charging faculty with the identification of ways to expand the use of hybrid course models to increase enrollment, have more meaningful student interactions (even though total contact time may be reduced), and enhance student achievement. Such a model will allow more students to be enrolled per faculty, commute to FIU less often (reducing carbon footprint), yet maintain the on-campus interactions that are critical to a student's success and facilitate a strong life-long commitment to FIU. It also will allow FIU to use

existing space more efficiently - a critical need with PECO (Public Equipment Capital Outlay) projects not on the horizon - and enhance 4-6 year graduation rates.

Examples of implementation strategies for discussion:

- a. Develop technology such as classroom capture, hybrid courses, competency-based assessment including prior learning assessment, MOOCs, and fully online courses and degrees to support the educational needs of a growing student population
- b. Leverage external funding by integrating interdisciplinary approaches
- c. Advance FIU's strategic growth by supporting an institutional culture that expects, rewards, and sustains activities involved in generating external funding
- d. Develop quality measures for FTIC and strive to increase quality every year

Recommendation 4: Expand financial base through organizational efficiencies, diversification of revenue streams, data-driven decisions, and an incentive-based budgeting system

Metric: Invest resources in preeminent programs utilizing an incentive-based budgeting system implemented in 2016

The future growth of FIU is dependent upon adequate funding. Traditional funding sources will need to be supplemented by a multifaceted financial base. Operational efficiency needs to be partnered with an entrepreneurial approach to generating income. FIU needs to realign its operations to take into account declining budgets for maintenance and to demonstrate the cost-effective custodianship of university resources. The stewardship of FIU resources and the development of university research and creative activities should be viewed as interrelated.

Investment must be made in areas where FIU can truly be excellent, especially in programs that are unique in the country/the world. This would attract quality faculty and students, which will enhance opportunities to garner research grants and philanthropic gifts.

Examples of implementation strategies for discussion:

- a. Work with an external auditor to review management and organizational structures and processes
- b. Allocate budget to units utilizing an incentive-based budget model that links funding to activity generating revenue and increases overall transparency of the university budget
- c. Identify and invest in academic programs and faculty that set FIU apart (where we are best in the world/U.S. or can become best in the world/U.S. by a target date and where we directly serve regional issues and needs). This can in part be achieved by developing centers and institutes that are both key to the SUS research portfolio and demonstrate relevance through sustained collaboration and funding.
- d. Make environmental sustainability a guiding principle in the management of FIU facilities and resources
- e. Recognize the campus as a landscape for learning and creativity
- f. Continue and strengthen the FIU tradition of master planning with local communities to better utilize FIU's investments and to leverage local, state, and federal funding
- g. Incentivize entrepreneurial approaches by deans, chairs, and center directors to generate revenue, reduce costs, and propel online and cross-disciplinary education

Recommendation 5: Launch a synchronized communications campaign to elevate the FIU brand focused on attracting donors

Metrics: Increase the number of national and international media hits annually and complete capital campaign raising more than \$750M in private gifts by 2020

FIU has matured into a top public research university with a strong portfolio of programs in the sciences and humanities. However, because it is still under 50 years old, the perception of the university is still largely not reflective of our true status. In fact, many alumni, community stakeholders, and policy makers still do not realize how far FIU has come. The fact that many colleges and divisions within FIU have independent communications strategies fragments the message and adds to the brand confusion. FIU should not be all things to all people and risk sacrificing quality.

Effective communication about the research, humanities, and the creative enterprises at FIU is one important way to change this perception. FIU needs to tell the story of the many ways it engages with the community and region, contributing to its health and vitality with the expertise and resources uniquely at its disposal. Stories about the research and creative excellence within the academic units are a way to start building brand credibility and need to be well publicized. Communication should include FIU's commitment to use its resources to be a solutions center for the local community and beyond; and the fact that 80% of graduates remain in Miami and are the future the city's workforce.

In order to attract private funding and ensure public support, FIU must create an aggressive, intentional, and unified messaging strategy aimed at raising the level of awareness both within the university and in the community. The message may be multi-faceted to give different units the flexibility to tailor it to specific audiences but it remains unified. This demonstrates that the university does not duplicate efforts but is nimble, efficient, and collaborative. The advancement effort benefits from clear, coordinated messaging about FIU's brand as well as from a coordinated, goal for each organization with whom FIU wants to do business. Single strategies per organization will yield larger philanthropic investment over time and mitigate donor fatigue – which can occur when multiple uncoordinated asks are going to the same organization.

Therefore it is important to note that a capital campaign is a university-wide effort. While University Advancement is responsible for coordinating the strategy to reach the fundraising goal, the division can only be successful if it can effectively unite efforts collectively. In launching the largest campaign in FIU's history, the university must adopt the collective responsibility to raise \$750 million.

Examples of implementation strategies for discussion:

- a. Complete capital campaign and raise more than \$750M in private gifts by 2020
- b. Work with academic leaders to implement donor relations best practices
- c. Develop effective communication strategies with the donor in mind
- d. Coordinate university-wide strategy on biggest prospects or high profile partners
- e. Highlight impactful research, engagement, and creative activities with particular focus on how FIU research impacts the community (e.g. Center for Children and Families)
- f. Develop an aggressive media strategy focused on garnering national and global media attention for FIU's preeminent programs
- g. Create a web presence that reflects a more purposeful approach to advancement

Recommendation 6: Intentionally pursue Carnegie “Very High Research” Designation

Metric: Increase PhD production in STEM areas by 20% by 2020, increase patent production by 500% by 2020

FIU faculty conduct world-class research that builds knowledge, solves problems, and improves society. FIU is an important base of knowledge, expertise, and entrepreneurship for South Florida. The net economic impact of FIU's non-payroll operating expenditures and the personal expenditure of its employees at the county level is 7,650 jobs created or \$539.8 million of output.

In addition, investment in preeminent programs is robust. Achieving the Carnegie “Very High Research” designation would allow the university to be a stronger competitor for federal funding, benefitting faculty and the institution as a whole. Donors, from individuals to corporations to family foundations, are also stressing the need for impactful philanthropic funding through research based metrics. Returns on philanthropic investment need to be demonstrated in order to attract and secure transformational, long-term funding. FIU’s current state of teaching, research, and technology transfer activities within the context of other SUS Carnegie Research institutions is reflected in Appendix 3.

Examples of implementation strategies for discussion:

- a. Increase PhD production particularly in STEM fields by 5% per year
- b. Increase grant expenditures by 5% per year
- c. Establish a focused and coordinated approach to research centers and partnerships, promoting topic-centered facilities to deliver collaborative research
- d. Develop incentives to create and increase patents, licensing, and startups
- e. Identify key research areas that build on our strengths
- f. Leverage ROIs with current C&Is. Examples include the Environment (SERC, Water, ICTB), International Affairs (LACC, CRI), Health (CCF, BSI, CNI) and STEM. The current list of C&Is ranked by total budget is listed in Appendix 3).
- g. Use a standardized rubric to evaluate and prioritize current and new opportunity areas (see example rubric in appendix 2)
- h. Recruit, mentor, and retain top faculty focusing on FIU’s strengths and strategic priorities
- i. Ensure FIU faculty have the resources necessary to develop collaborative and competitive research initiatives
- j. Fundraise to establish endowed scholarships for PhD students and post-doctoral researchers/fellows
- k. Provide mechanisms to streamline PhD student graduation
- l. Develop program to encourage faculty to fund/recruit postdoctoral scholars
- m. Improve research support services to reduce administrative burden of faculty and allow more time writing grants

Recommendation 7: Innovate and integrate healthcare education, research, and delivery

Metric: Grow health-related grant funding by 100% by 2020 through FIU’s Innovative Health Initiative as a global leader in strategic areas

FIU will lead in shaping the future of health education, research, and service delivery - the “Innovative Health Initiative” (IHI). Health is envisioned as an equation best solved through a holistic approach that integrates genomics, behavior, access, technology, environment, education, economics, and policy while balancing that solution with the cost to deliver it and the time to research and implement it.

Examples of implementation strategies for discussion:

- a. Take advantage of FIU’s strengths to become a global leader in shaping the future in five strategic areas: health disparities, childhood health, aging, climate change, and disaster preparedness and computationally intensive data science
- b. Make serving FIU’s diverse local population a key point of focus. Research undertaken in Miami can be used to implement programs to serve as a model for diverse urban areas of the future, in the US and globally.

The IHI will accelerate scientific discovery through the following:

- a. NIH and NSF model of interdisciplinary research
- b. Cross-pollination of ideas and deep collaboration across units

- c. Promotion of integrative approaches that combine research from the basic and behavioral sciences with the applied sciences

Recommendation 8: Strengthen reputation as critical academic partner/solutions center for the local marketplace and beyond

Metric: Increase public/non-profit/private partnerships and pioneering research that address community needs

FIU serves the communities of South Florida through an ambitious set of community programs that apply university resources to key social, economic, and environmental needs. By establishing strong collaborations, FIU should position itself as the primary academic partner for communities and businesses in South Florida, recognized as a relevant and innovative solution center. These projects will disseminate research and innovation that strengthens the economy of South Florida. FIU has established strong linkages with South Florida non-profits and cultural organizations. Additionally, as FIU's research strengths and innovation becomes nationally relevant, stronger synchronization with organizations like the Beacon Council or Greater Miami Chamber of Commerce, and other national corporate partnerships will contribute directly to Miami Dade's economic growth. Increasingly, FIU will harness its innovation strengths, engagement reach and alumni population to be a driver in the transformation of the entrepreneurial ecosystem of South Florida while increasing talent retention locally.

In the arts, FIU can leverage Miami's growing cultural identity and align itself with the community through more private/public partnerships. The Arts allows the University to engage the students and the community and bring back alumni to campus. Involving students in the arts and creative activities will help create more well-rounded and dynamic individuals – ones that can more readily integrate into industry to be the pipeline into the South Florida employment market.

Examples of implementation strategies for discussion:

- a. Dramatically increase FIU entrepreneurial activities and products (patents, spin-offs, innovation)
- b. Build on FIU's traditions of private/public partnerships
 - i. Campus based (RCCL, FPL)
 - ii. Internships (local, national and global)
- c. Establish FIU as gateway to the arts in Miami
 - i. FIU students to perform at community venues
 - ii. Bringing local community to campus for cultural activities
- d. Increase sponsored research in areas of strategic priority (Water, Ecotoxicology, Wall of Wind)
- e. Establish FIU as a valued solutions center to major issues facing community (e.g., sea-rise/extreme events)
- f. Serve the educational needs of South Florida's retired community (silver tsunami, access to healthcare)

Recommendation 9: Leverage global status of FIU and Miami

Metric: Increase international student enrollment, develop additional global business partners, and expand international programs

FIU has a global future with an established and primary focus on Latin America and the Caribbean. It is uniquely placed with a geographic location on the edge of the Caribbean and in close proximity to Central and South America and has a tradition of global engagement, which is reflected in a number of innovative international partnerships (over 40 countries). However as FIU becomes more globally

focused, there are also opportunities to strengthen current programs in Asia, Europe, Africa, the Middle East and more specifically, the BRICs nations of Brazil, Russia, India, and China.

There is demand for FIU's services and resources internationally, and such partnerships will form an important part of the university strategy for academic and financial growth. The global engagement strengthens FIU's international brand, essentially reinforcing the "I" in FIU.

FIU should exploit the strategic advantages of "place," e.g., geography, diversity, demographics, climate, and culture. Miami is the fourth largest urban area in the US, a cosmopolitan city at the gateway to Latin America, the Caribbean and the world. It is a unique arena in which to explore the future of the USA and the region. FIU needs to fully integrate with Miami's growth as a regional and global center for tourism, culture, biotechnology, agriculture, health care, and the need to prepare for future extreme events, etc.

While China and India remain large source countries for international students at FIU, efforts at recruiting students should span the globe. Given FIU's proximity to Latin America and the Caribbean this region should continue to be a strategic market for recruitment. Closer to home, in leveraging the global and Miami, FIU must also develop strategies for recruitment, external relations, alumni engagement, philanthropy, and corporate partnerships in two global US cities: New York and Washington, D.C.

Examples of implementation strategies for discussion:

- a. Increase global learning professional development for faculty teaching in online, web assisted, and face-to-face courses
- b. Recognize global learning research and instruction in tenure, promotion, and hiring
- c. Increase visibility and impact of the Office of Study Abroad
- d. Fully utilize the resources of the international centers (e.g. LACC, CRI)
- e. Develop curricular offerings that allow every FIU academic program to pursue niche opportunities to attract students and prepare them for the global marketplace
- f. Establish offshore programming in SACSCOC-approved sites (Examples include China, Guatemala, Jamaica, Panama, and Dominican Republic)
- g. Leverage and expand existing programs in China
- h. Support areas of strategic value to FIU through partnerships with overseas universities and international agencies
- i. Leverage US and federal government relationships as well as State of Florida's partnerships and relationships abroad
- j. Develop FIU as a global solutions center. Examples include water, tropical ecology, and sustainable architecture
- k. Focus on building revenue-building courses and activities with international partners
 - i. Develop more MBA-like courses
 - ii. Expand continuing Education (workforce training, language immersion)
 - iii. Increase Study Abroad/Student Exchange opportunities
 - iv. Identify courses of interest to our international markets and offer online classes to address the demand

Appendix -1: iREAL Commission working groups - Commissioner areas based on President's initial ten questions and additional areas developed (<http://commission.fiu.edu/about-fiu-ireal/commissioner-participants/>)

1. What are the major drivers of change, now and in the foreseeable future, in the delivery of educational services, and how will they likely impact FIU and our predominantly minority and non-traditional (working) students who have been shown to have a greater need for high-touch educational experiences?

1. **Commissioner Connie Boronat**

staffed by Liz Greb

2. Leslie Richardson
3. Jeanette Cruz
4. Alexandra Quadra
5. Eric Brewe
6. Shekhar Bhansali
7. Leanne Wells
8. Ive Barreiros
9. Julian Edward
10. Norma Goonen
11. Elianis Nieves

2. What are the major drivers of change in the assessment of learning (i.e., prior learning and competency-based assessment) at the university level, and how will they impact FIU? For instance, the recently passed HB7029 requires the Board of Governors to develop rules to enable students to obtain university credit for online courses, including MOOCs, taken before they enroll in a SUS institution.

1. **Commissioner Elizabeth Bejar**

staffed by Jenn Gebelein

2. Janie Valdes
3. Susan Himburg
4. Rosa Chang
5. Bridgette Cram
6. Ida Rodriguez
7. Barbara Manzano
8. Nancy Colon
9. Susan Clemmons
10. Matt Hagood

3. How will new modalities of education impact the six-year graduation rate of our first-time-in-college students, the primary performance funding indicator used by the Board of Governors?

1. **Commissioner Kathleen Wilson**

staffed by Valerie Johnsen

2. Adam Drisin
3. Jamie Sutton

4. Alan Gumerson
5. Christine Dundas
6. Bruno Phanord
7. Katherine Perez
8. Danilo LeSante
9. Adam Owenz
10. Diana Ashley
11. Enrique Villamor

4. The American public research university is built upon instructional revenues providing the salary support for faculty to pursue their research. How can the research university survive if the focus is on providing validation of individual learning in ways that are "less expensive than ever before"? Increasing research & PhD production

1. **Commissioner Ken Furton**

staffed by Meredith Newman

2. Lidia Kos
3. Maureen Pelham
4. Ranu Jung
5. Shahed Al-Tammar
6. Dale Williams
7. Peter Hernandez
8. David Chatfield
9. Nancy Borkowski
10. Fu Zhou

5. What alternative scenarios of institutional change should we consider, and what are the pros and cons as well as the costs of the initiatives proposed? e.g. Smaller and more focused could improve our national rankings but reduce our local impact Being a leader in sustainability; Improving athletics

1. **Commissioner Jerry Cohen**

staffed by Emily Gresham

2. Mike Heithaus
3. Christopher Bultnick
4. Stuart Kennedy
5. Mariel Acosta-Garcia
6. Aime Martinez
7. Karen Fuller
8. Medjy Pierre-Louis
9. Sara Lipman
10. Peter Campbell

6. How can faculty, staff, students, and the community be thoroughly engaged with changes that are proposed? e.g. continuous use of social media and open forums with live polls for suggestions and feedback. Becoming more community engaged; maintaining a life-long relationship with graduates

1. **Commissioner Pablo Haspel**

staffed by Gisela Casines

2. Duane Wiles
3. Amy Woltman
4. Amanda Garcia
5. Teresa Ponte
6. Lori-Ann Cox
7. Michelle Mason
8. Luis Bolanos
9. Lauryl Collins

7. How will FIU respond to, and benefit from, the changes in the global educational market?

Expanding overseas educational activities

1. **Commissioner Mihaela Plugarasu**

staffed by John Stack

2. Mahfoud Oubadji
3. Christine Toguchi
4. Steve Luther
5. Hilary Landorf
6. Mercedes Ponce
7. Rocco Angelo
8. Eunju Suh
9. Sharon Spaltenstein
10. Bill Bullard

8. How do we balance the pressure to deliver inexpensive degrees with the need to maintain a high quality product that represents excellent value to our students and maintains FIU's trusted brand status? Expanding access to online and hybrid classes and programs; Improving graduation rates

1. **Commissioner Carlos Becerra**

staffed by Jo Adkins

2. Joyce Elam
3. Diane Singh
4. Francisco Valines
5. Laura Padron
6. Valerie Patterson
7. JC Espinosa
8. Philip Koenig
9. John Stuart /Faquiry Diaz
10. Javier Rodriguez
11. Gabriel Albelo

9. How can we best harness the innate entrepreneurial spirit of our students, staff, faculty, and alumni? Business rep? Expanding and diversifying income streams.

1. **Commissioner Christina Jardim**

staffed by Mike Maunder

2. Seema Pissaris
3. William Trueb
4. Dileep Rao
5. Rafael A. Paz

Appendix 2: iREAL ROI Rubric for Evaluating Existing and New Areas of Emphasis

Existing and New Areas of Emphasis Evaluation Matrix

Project Name: _____

Date: _____

Categories	Level of Adherence					Score
	1	2*	3	4***	5	
University Priorities						
Advance FIU's Strategic Themes	No relevance to FIU's strategic themes		Limited relevance to FIU's strategic themes		themes	
Support FIU's Mission	No relevance to FIU's mission		Limited relevance to FIU's mission		Direct and positive relation to FIU's mission	
Produce additional auxiliary revenue	Total Revenue: < \$50,000		Total Revenue > \$100,000		Total Revenue > \$200,000	
Advancement						
Attract donor interest: Impact	helped, addressing pressing need)		people helped, addressing pressing need)		helped, addressing pressing need)	
Attract donor interest: Prestige	community, student interest		media, community, student interest		community, student interest	
Attract donor interest: Unique	Many of its kind in existence		Few of its kind in existence		One of a kind	
Expand funding opportunities	Total Fundraising < \$100,000		Total Fundraising > \$500,000		Total Fundraising > \$1,000,000	
Increase number of prospects	< 10		11 to 19		> 20	
Research						
Improve PhD Production	graduate		graduate		graduate	
Recruit outstanding faculty	top faculty		recruit top faculty		to recruit top faculty	
Increase grant awards	Total Grants < \$100,000		Total Grants > \$500,000		Total Grants > \$1,000,000	
Expand potential for patents/spin-off	No patents/spin-off potential		Limited patents/spin-off potential		High patents/spin-off potential	
External Relations/Engagement						
Benefit the South Florida community	No benefit to the community		Some benefit to the community		Significant benefit to the community	
Brand and/or promote FIU	Few opportunities to brand or promote FIU		Some opportunities to brand or promote FIU		Many opportunities to brand or promote FIU	
community, non-profit)	No opportunities for partnerships		Some opportunities for partnerships		Many opportunities for partnerships	
Retention/ Graduation Rates						
Engage student	and events		seminars and events		seminars and events	
Supports student success	successfully achieve the learning outcomes		of students to successfully achieve the		of students to successfully achieve the	
Increase retention rates	No influence on student retention rates		Limited influence on student retention rates		rates	
Attract quality students	applicants		student applicants		of student applicants	
Enhance student experience	Many of its kind in existence		Few of its kind in existence		One of a kind	
Inspire active learning	Few opportunities for active learning		Some opportunities for active learning		Many opportunities for active learning	
Inspire next generation (K-12)	No opportunities to engage K-12 students		Some opportunities to engage K-12 students		Many opportunities to engage K-12 students	
Diversify course format	No impact on the current course format		format		offered	
Increase enrollment opportunities	courses students need		students need to take (less than 10%)		courses students need. (10% or more)	
Potential challenges						
Restrict land use	Significant restriction of land use		Some restriction of land use		No restriction of land use	
Political liability	Politically unsupported		Politically neutral		Politically supported	
Perception liability	Lowers perception of FIU		Does not affect perception of FIU		Enhances perception of FIU	
Financial liability	Requires significant FIU investment		Requires some FIU investment		Does not require FIU investment	
						TOTAL SCORE = 0

*Exhibits most characteristics of '1' and some of '3'

***Exhibits most characteristics of '3' and some of '5'
